Research Intern Opportunity

Rebecca E. Lee, PhD
Professor, Center for Health Promotion and Disease Prevention
College of Nursing & Health Innovation

Sustainability via Active Garden Education (SAGE) is seeking talented undergraduate students to help with an active intervention based in early care and education centers with Hispanic/Latino 3-4 year old children and their families. SAGE tests a garden based physical activity and nutrition intervention for preschool aged children in Hispanic/Latino neighborhoods to increase physical activity, discourage sedentary behavior, and improve healthy eating habits.

**Students will be actively involved in the following projects**
1. Community based research: collect measurements and facilitate weekly classes.
2. Site assessments and observations.
3. Literature reviews while working alongside PhD students as they develop their dissertations.
4. Presentations based on findings from project.

Potential opportunities to apply for and present at national conferences, write manuscripts for publication, and learn how to write grants for research funding.

**Other benefits to joining our lab**
- Learn about all aspects conducting a community based research project and improve scientific writing skills.
- Experience working with children, parents, and teachers in early care and education centers.
- Training in data collection and data entry (i.e. SPSS, NDSR, and Excel).
- Contributing to the creation of research materials.
- Possible letters of recommendation.

**Opportunity information**
Project majors of interest: all health or science majors including students in exercise, kinesiology, nutrition, nursing, psychology, sociology, and Spanish. **Students who are bilingual English/Spanish or with Spanish skills or training are especially encouraged to apply.**

Students can participate as interns (12-20 hours/week), or can enroll in an independent study course and receive course credit (12 hours/week). **Hours are flexible and can be completed anytime between 8am-5pm on Monday through Friday.** Some evening shifts may also be available.

The UNDO lab is located in the College of Nursing and Health Innovation, Health South (NHI-1) building, on the downtown campus. To apply, send a CV/Resume, unofficial transcripts, and a statement of interest to Anel Arriola at a.arriola@asu.edu or (602) 496-2011.
