Community-Based Research Opportunity

Focus:
- Community-based, culturally grounded lifestyle intervention that increases nutrition and physical activity behaviors in pre-diabetic Latino teens, ages 12-16

Students will gain mentored experience in research related activities including:
- Assist with data collection, data entry, data analysis, and processing in a clinical research laboratory, and assist with the preparation of reports and materials
- Delivery of fitness intervention with youth and adults

Benefits:
- Experience working in the community
- Possible letters of recommendation
- Possibility to present information from the study at conferences
- Can be used for research course credit or for a Barrett Honor’s thesis project

Students are scheduled based on their availability and project needs:
- Hours are flexible and can be completed anytime between 7am-7pm Monday through Saturday

Requirements:
- Interest in health promotion and disease prevention among vulnerable populations
- Spanish speaking students are strongly encouraged to apply

To apply for the position, contact Allison Williams at Allison.Nagle@asu.edu or 602-496-0147.
